

SheetFeeder IJ

Boost productivity with roll-feed

*The SheetFeeder IJ feeds
the Xerox IJP900 printer and
consists of an unwinder, cutter and
sheet transport.*

- ✓ *Reliable inline roll feeding*
- ✓ *For Xerox IJP900*
- ✓ *More uptime*
- ✓ *Lower paper costs*
- ✓ *Any form size*

Bring roll feed productivity and cost savings to your Xerox IJP900 inkjet production printer. The SheetFeeder™ IJ roll feed system feeds single sheets on demand for an operator shift or more, increasing throughput while lowering downtime, operator involvement and paper costs.

SheetFeeder IJ is like a 50,000 sheet (20# bond/75 gsm) tray added to the IJP900 – run for hours between loads. Both printer and operators become more productive. Paper is purchased in rolls instead of sheets for savings of 20% or more. Run pre-printed

forms with the print register option. Hole punch and running perforator options allow additional applications to be run cost-effectively in-line.

Global service and around-the-clock support help ensure our reputation as the industry's reliability leader. Our products increase productivity, cut labor and paper costs, and even make new applications possible - Tecna solutions truly empower digital print to help you do more with less.

SheetFeeder IJ

Boost productivity with roll-feed

The SheetFeeder IJ includes an unwinder, cutter and sheet transport, and sits to the right of the Xerox IJP900 inkjet production printer.

The user-friendly unwinder includes automatic decurling, no-lift roll mounting and a self-centering design. Rolls up to 50" in diameter are loaded quickly and easily into the unwinder directly from an optional roll cart. The unwinder feeds a paper web to the SheetFeeder's cutter, which then accurately produces consistent, square sheets for on-demand feeding. Form lengths are easily changed with the touch of a button.

The reliable sheet transport, with a patented single sheet feeding mechanism, feeds sheets into the right-most feeder module of the IJP900 on demand. All printer feed trays remain available for feeding other sheets. Because there is no buffer, there is virtually no waste when changing applications.

The flexible SheetFeeder IJ allows both 8.5" x 11" and 11" x 17" applications to be run from the same 11" wide rolls or both A4 and A3 applications from the same 297 mm wide rolls. A SheetFeeder-equipped

IJP900 may be easily switched on a job-by-job basis between roll and normal cut sheet operation.

All components use standard power, are mobile, modular, compact, and designed to dramatically improve work-flow.

SheetFeeder IJ is marketed and sold worldwide by Xerox.

Print Register

Run pre-printed forms from a roll.

Running Micro-Perforator

Perforate in process direction to create tear-off remittance slips or other special applications, for significant savings on special stocks.

Optional Capabilities

Hole Punch

Operator selectable in-line US 3-Hole or A4 2/4-Hole. Avoid changing stock, save money on paper, and reduce inventory. Other punch patterns are available.

Right-hand and left-hand infeeds

For space planning flexibility.

Roll carts

Move, store and load rolls with greater efficiency.

Roll cart

Technical Specifications

Performance / Media

Paper weight	27# text - 80# cover	40 - 220 gsm
	For basis weights outside this range, consult Tecna	
Roll diameter	4" - 50"	100 - 1270 mm
Roll weight max.	1500 lbs	680 kg
Core size	3", 5", or 6"	70, 150, 200 mm
Roll Width	7" - 13"	178 - 330 mm
Sheet Size	7"x7" to 13"x19.2"	178x178 to 330x488mm

Environmental - Electrical

Temperature	50° - 90° F	10° - 32° C
Humidity	15 - 85 %	
Acoustics	Less than 90 dbA	
Power US	110 - 120 VAC 50/60 Hz, 6A + 6A	
Power EU	or 220 - 240 VAC 50/60 Hz, 3A + 3A	

Agency Approvals UL, CUL, FCC, CE

Configuration Example

- 1 SheetFeeder IJ Unwinder
- 2 SheetFeeder IJ Cutter
- 3 SheetFeeder IJ Sheet Transport
- 4 Xerox IJP900
